About myself

Assalamu Alaikum! I am an easy-going and happy person with a positive attitude towards life. I am simple, soft-spoken, respectful, and an educated person with the right mix of modern and traditional cultures. I am God fearing, perform Namaz five times a day. I come from a religious family who believes in following our religious traditions. I truly value and cherish Muslim culture and values. My faith is an integral part of my life, and it guides me in everything I do. But that doesn't mean I don't know how to have fun. I believe that life is a beautiful gift, and I try to enjoy every moment of it. I enjoy the moments of life by traveling, through which I explore the wonders of Allah's creation, gaining new perspectives and experiences.

When I have some free time, I really enjoy kicking back and getting lost in a good movie, TV show, or anime. I'm drawn to how they introduce me to different cultures and stories. Movies and shows are great conversation starters, and I'd love to find someone who's also into exploring different genres and talking about them. Whether it's the latest blockbuster or a hidden gem from another country, there's always something new to discover and enjoy together.

I prioritize a healthy lifestyle and strive to keep my body and mind in good shape. Staying active is not just about physical health; it's also about mental clarity and emotional resilience for me. I do not drink, smoke or do drugs.

I've dedicated the last 11 years to building a successful career in the fast-paced world of IT, working as a Senior Data Scientist (AI Engineer) within the dynamic environment of corporate America. My journey has been marked by continuous learning and significant contributions to the field of artificial intelligence.
